REACH (Registration, Evaluation and Authorisation of Chemicals Regulation)
(EC No 1907/2006¹, Directive 67/.548/EEC²)

LCR are aware of the European Regulation REACH 1907/2006.
This regulation requires substances in quantities over 1 tonne per year to be registered within the EU by the manufacturer or importer.

LCR is not a producer or importer of substances. We are classified as a "Downstream User".

LCR are therefore not obliged to register or pre- register these substances.

LCR are reliant on our suppliers to register these substances.
When substances are registered, our obligation under REACH requires us to pass this information on down the supply chain to our customers.

Registration of substances will be phased in over the next 10 years.

As you can appreciate, we are in contact with our suppliers to gather the relevant information with regard to REACH, but this takes time.
However many of our suppliers are also "Downstream Users"

At the present time we are not aware of any issues regarding the continuity of supply of substances used in LCR products.

For and on behalf of LCR Capacitors (EU) Ltd

A handwritten signature in blue ink that reads 'kpowell'.

Miss Kim Powell
